

Antriebswellen mit der patentierten Face Spline Technologie erhalten Sie nur bei GKN.

Diese zeichnet sich durch einfache Montage und Wartung aus und vermeidet jegliches Spiel in der Verbindung Seitenwelle und Radnabe.

Zudem bietet die Technologie eine höhere Steifigkeit und eine Reduzierung der ungefederten Massen von ca. 20% im Vergleich zu herkömmlichen Bauteilen.

Durch den größeren Durchmesser der Verbindungsverzahnung ist eine um bis zu 50% höhere Drehmomentübertragung als bei der herkömmlichen Lösung möglich.

Auf den nachfolgenden Seiten erhalten sie weitere Infos über unsere neuen Face Spline Antriebswellen.

Driveshafts with the patented Face Spline Technology you'll only get by GKN.

This technology is easier to assemble and service and it eliminates backlash at the connection between driveshaft and wheel hub.

In addition, the technology offers higher stiffness and an un-sprung mass reduction of around 20% compared to conventional assemblies.

Torque transfer can be up to 50% higher than on conventional assemblies due to the greater diameter of the bell.

You'll find more info about our new Face Spline driveshafts on the following pages.
